SUMMARY

Program and operations leader with nearly 20 years across fintech, customer operations, and AI data operations. Build systems and teams that make complex operations easier to run, coordinating cross-functional delivery and using analytics to support staffing, quality, and launch decisions.

EXPERIENCE

Meta · Feb 2025–Present · Seattle, WA

Senior Project Coordinator, Data & AI Operations · Oct 2025–Present

Previously: Team Lead, Generative AI (May–Oct 2025) · Data Annotator, Generative AI (Feb–Oct 2025)

- Scaled teams from **0 to 80+** and lead an **80+ person annotation team** while supporting reporting for a wider **400+ person, 6-region operation**. Help leads interpret trends, identify staffing constraints, and escalate delivery issues.
- Scaled **annotation workflows to 9+ languages**, building and ramping them while confirming compatibility with engineering and product. Continue to refine workflow configuration and UI usability; helped scale **sales and pitch workstreams**.
- Coach **12 workstream leads** across 11 teams and 15+ projects; cross-trained **10+ coordinators** and delivered **5 training programs**. Developed centralized training resources and tooling for team leads and project coordinators; serve as go-to onboarding support for new coordinators and leaders entering ambiguous workflows.
- Built **10+ dashboards and 50+ Presto/Trino SQL queries** for quality, capacity, and staffing decisions, with reporting that supports **140+ task configurations** without query rewrites; led migration of reporting and automations onto newer internal platforms.
- Designed **rules-based intake** that creates tracked tasks, routes requests, and flags exceptions for human triage, plus batch monitoring. Established audit sampling for **human evaluation and data quality in AI training workflows**; supported quality leads on automated scoring, human review, and known-answer benchmarks.

Kikoff · Aug 2023–Jan 2025 · Reno, NV

Product Owner, Kikoff Canada (Operations, BPO & QA) · Jul 2024–Jan 2025

Previously: Operations Training & Development Manager (Aug 2023–Jul 2024)

- Drove operational delivery for **Kikoff's Canada expansion**, coordinating readiness, timelines, vendor implementation, and app work with product and marketing. Supported Quebec French-language requirements and conversion of US credit policy to Canadian policy.
- Managed BPO relationships for a **120-person offsite team**. Owned training, QA, process improvement, and documentation; handled eOscar disputes, KYC and fraud claims, and subpoenas. Used customer feedback trends to recommend product and process changes.

Figure · Jun 2018–Oct 2021 · Reno, NV

Operations Manager, Originations · Feb 2020–Oct 2021

Previously: Customer Success Supervisor (Mar 2019–Feb 2020) · Associate (Jun 2018–Mar 2019)

- Helped scale originations operations from **pre-launch to $200M+ in monthly loan volume for my team**, hiring, training, and leading **~50 people** across sites. Created a leadership-development program and used workforce planning to align staffing to delivery goals.
- Led a vendor rollout and redesigned a manual notarization step to address closing delays. Helped develop automated live-notary sessions and county recording coordination with engineering, product, legal, compliance, risk, and credit.
- Partnered with Figure's future Director of Data Science on an **AI-assisted response workflow**. Helped develop answer coverage and confidence-based routing, with uncertain cases sent to a human alongside a suggested reply.

SKILLS

Program & Operations: Program/project management · Stakeholder coordination · Vendor/BPO management · Workforce planning · Training and leadership development · Process improvement · CRM workflow optimization

Data & AI: SQL (Presto/Trino) · KPI and dashboard design · Metric validation · Python scripting · R · Tableau · AI-assisted workflows · Human-review design

EDUCATION & PROJECT

University of Nevada, Reno · B.A., Sociology & Psychology · Google Data Analytics Professional Certificate

Data Isekai: Tower of Query · data-tower.netlify.app
Built a 10-floor SQL learning game with in-browser SQLite to reinforce practical analysis skills.

Earlier experience: Concept Labs (formerly Concept Art House), 2021–2022 · SCUF Gaming · Amazon · Apple
